AGRO TRADING

Our initial business model revolved solely around the trading of Agro produce on a seasonal basis, where we mainly financed and traded Agro produce with our clients, through this enterprise we have been able to build a strong SOURCING network in the value chain. Farm gate sourcing enables us to source directly from producers due to our vast network and hands-on approach which enables us to seal deals at very competitive rates from inception....

AGRO CONSULTANCY

Consultancy forms part of our core objectives and hence guides us in our pursuits and development as a business. We tap strongly into the expertise of our research and development team to enable us to take full consultancy projects from clients both far and near.

We mostly focus and work with clients that want to expand into West African space. We make it our obligation and focus to **CONNECT** into their game plan with value adding relevant data and full-scale consultancy services to provide them a solid runway for easy **TAKEOFF**.

AGRO PROCESSING

In line with our commitments to achieve our ultimate goal, we are on course to set up a state-of-the-art Cocoa Processing factory to enable us process cocoa beans from BEANS TO BAR. Through strategic partnerships we have been trading and processing semi finished cocoa products for almost a decade globally.

We have over the years mastered the skill to successfully sign off tolling agreements with ISO certified processors globally and also tailored outsourcing models according to client specifications. We currently have a chocolate brand called “YENDZICHOCOLATE” birthed out of this partnership models.

ORGANIC COCOA & SOCIAL IMPACT

Organic Cocoa Products – There is a big global interest in the area of organic cocoa beans and cocoa semi finished products. Our R&D team is very much on top of this emerging sector and is very open to collaborate with any client interested in sourcing organic beans and products from Ghana plus our social impact-oriented projects.

GREEN ECONOMY INTEREST

We pay close attention to green energy and its current upsurge due to our love for the environment and also creating value from waste Agro products. We have in the past developed projects using waste as the main source of energy to power boilers for Agro processing plants.

We continue to engage and pay close attention to international trends and development on this emerging industry since it is the future and have many viable GREENFIELD area yearning for innovations and value creation that empowers the UPSTREAM players and impact positively on the environment.
